(15) Description of Product:

Terminal blocks and accessories are protected by increased safety "b" explosion protection.

Terminal blocks are created by insulating body and conductive currentway. Groove and ribbons are used to secure creepage and clearances on the insulating body. Currentway is made from copper or its alloy with metal plated finish. Contact pressure between currentway and the conductor is developed by screw and clamp.

Terminal blocks are intended for mounting inside enclosure. Terminal blocks are intended for mounting of solid or stranded wires. Stranded wires could be crimped.

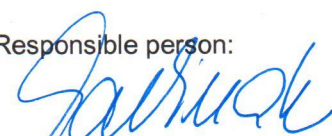

List of certified terminal blocks and accessories for each terminal block is given at the Annex no. 1 to this certificate.

Parameters of terminal blocks:

| Terminal block type | Rated cross section [mm <sup>2</sup> ] | Rated range of cross section [mm <sup>2</sup> ] | Tightening torque [Nm] | Rated current max. in case of rated cross-section [A] | Rated current max. in case of rated cross-section [A] | Rated voltage [V]   | Rated voltage [V] | Resistance of terminal block in case of rated cross-section [mΩ] |
